DATABASE MANAGEMENT SYSTEM

Title: - Airline Management

Team Details

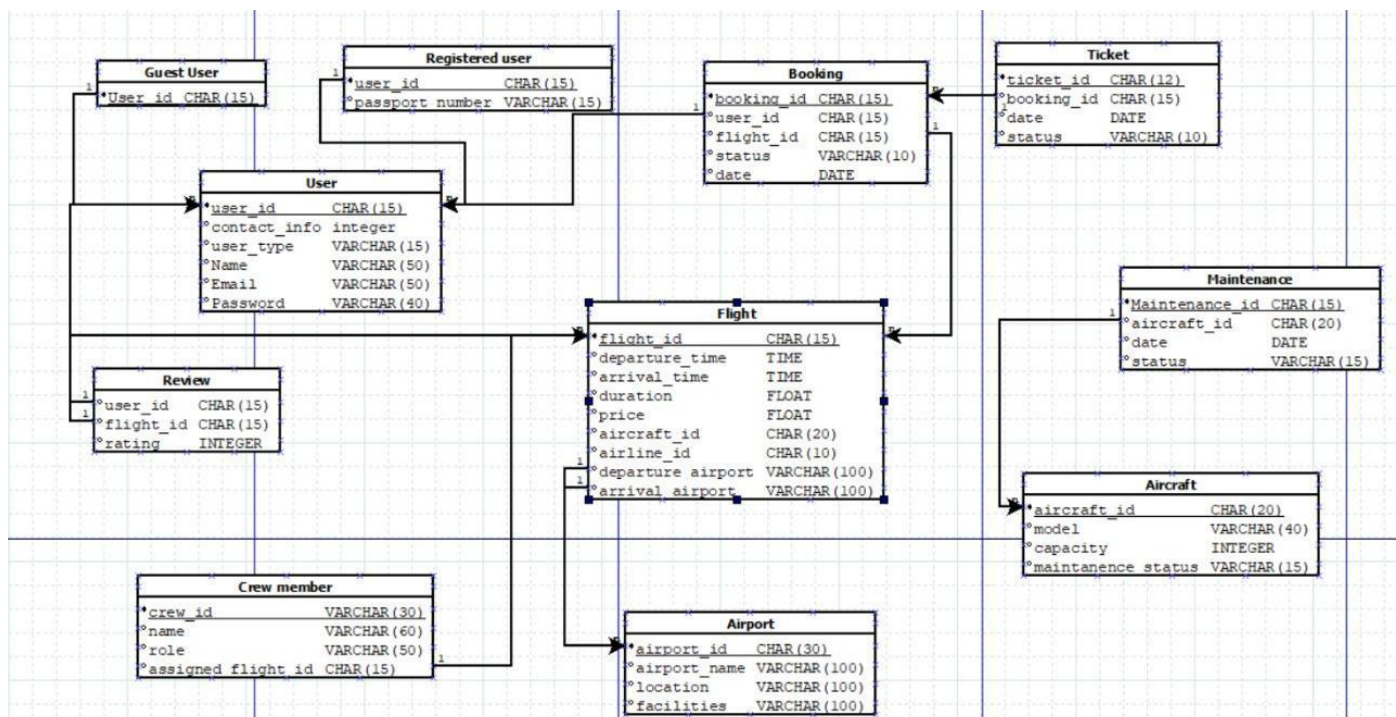

NAME (ID)
Rushi Gadhiya (202301156)
RishitRaj Jain (202301167)
Kathan Parikh (202301133)
Rushabh Jain (202301154)

ER-Diagram

Relational Schema :

Functional Dependencies (FDs) and their Minimal Sets (also called Canonical Covers) for each table is given below:

1. User Table

Attributes:

user_id, contact_info, user_type, Name, Email, Password

FDs:

$\text{user_id} \rightarrow \text{contact_info}, \text{user_type}, \text{Name}, \text{Email}, \text{Password}$

Minimal FD Set:

$\text{user_id} \rightarrow \text{contact_info}$

$\text{user_id} \rightarrow \text{user_type}$

$\text{user_id} \rightarrow \text{Name}$

$\text{user_id} \rightarrow \text{Email}$

$\text{user_id} \rightarrow \text{Password}$

Candidate Key: user_id

Already in BCNF since LHS is a candidate key.

2. Guest User Table

Attributes:

user_id

FDs:

$\text{user_id} \rightarrow \text{user_id}$ (trivial FD only)

Minimal FD Set:

$\text{user_id} \rightarrow \text{user_id}$

Candidate Key: user_id

Already in BCNF since LHS is a candidate key.

3. Registered User

Table Attributes:

user_id , passport_number

FDs:

$\text{user_id} \rightarrow \text{passport_number}$

Minimal FD Set:

$\text{user_id} \rightarrow \text{passport_number}$

Candidate Key: user_id

Already in BCNF since LHS is a candidate key.

4. Booking Table

Attributes:

booking_id , user_id , flight_id , status , date

FDs:

$\text{booking_id} \rightarrow \text{user_id}, \text{flight_id}, \text{status}, \text{date}$

Minimal FD Set:

$\text{booking_id} \rightarrow \text{user_id}$

$\text{booking_id} \rightarrow \text{flight_id}$

$\text{booking_id} \rightarrow \text{status}$

$\text{booking_id} \rightarrow \text{date}$

Candidate Key: booking_id

Already in BCNF since LHS is a candidate key.

5. Ticket Table

Attributes:

ticket_id, booking_id, date, status

FDs:

ticket_id \rightarrow booking_id, date, status

Minimal FD Set:

ticket_id \rightarrow booking_id

ticket_id \rightarrow date

ticket_id \rightarrow status

Candidate Key: ticket_id

Already in BCNF since LHS is a candidate key.

6. Flight Table

Attributes:

flight_id, departure_time, arrival_time, duration, price, aircraft_id, airline_id,
departure_airport, arrival_airport

FDs:

flight_id \rightarrow departure_time, arrival_time, duration, price, aircraft_id, airline_id,
departure_airport, arrival_airport

Minimal FD Set:

flight_id \rightarrow departure_time

flight_id \rightarrow arrival_time

flight_id \rightarrow duration

flight_id \rightarrow price

$\text{flight_id} \rightarrow \text{aircraft_id}$

$\text{flight_id} \rightarrow \text{airline_id}$

$\text{flight_id} \rightarrow \text{departure_airport}$

$\text{flight_id} \rightarrow \text{arrival_airport}$

Candidate Key: flight_id

Already in BCNF since LHS is a candidate key.

7. Review Table

Attributes:

user_id , flight_id , rating

FDs:

$(\text{user_id}, \text{flight_id}) \rightarrow \text{rating}$,

Minimal FD Set:

$(\text{user_id}, \text{flight_id}) \rightarrow \text{rating}$

Candidate Key: $(\text{user_id}, \text{flight_id})$

Already in BCNF since LHS is a candidate key.

8. Crew Member Table

Attributes:

crew_id , name , role , $\text{assigned_flight_id}$

FDs:

$\text{crew_id} \rightarrow \text{name}, \text{role}, \text{assigned_flight_id}$

Minimal FD Set:

$\text{crew_id} \rightarrow \text{name}$

$\text{crew_id} \rightarrow \text{role}$

$\text{crew_id} \rightarrow \text{assigned_flight_id}$

Candidate Key: crew_id

Already in BCNF since LHS is a candidate key.

9. Airport Table

Attributes:

airport_id , airport_name , location , facilities

FDs:

$\text{airport_id} \rightarrow \text{airport_name}, \text{location}, \text{facilities}$

$\text{airport_name} \rightarrow \text{location}, \text{facilities}$ (*if name is unique*)

Minimal FD Set:

$\text{airport_id} \rightarrow \text{airport_name}$

$\text{airport_id} \rightarrow \text{location}$

$\text{airport_id} \rightarrow \text{facilities}$

Candidate Key: airport_id

Already in BCNF since LHS is a candidate key.

10. Aircraft Table

Attributes:

aircraft_id , model , capacity , $\text{maintenance_status}$

FDs:

$\text{aircraft_id} \rightarrow \text{model}, \text{capacity}, \text{maintenance_status}$

$\text{model} \rightarrow \text{capacity}$ (*if model implies fixed capacity*)

Minimal FD Set:

$\text{aircraft_id} \rightarrow \text{model}$

$\text{aircraft_id} \rightarrow \text{capacity}$

$\text{aircraft_id} \rightarrow \text{maintenance_status}$

Candidate Key: aircraft_id

Already in BCNF since LHS is a candidate key.

11. Maintenance Table

Attributes:

maintenance_id, aircraft_id, date, status

FDs:

maintenance_id \rightarrow aircraft_id, date, status

aircraft_id, date \rightarrow status (*if at most 1 maintenance per aircraft/date*)

Minimal FD Set:

maintenance_id \rightarrow aircraft_id

maintenance_id \rightarrow date

maintenance_id \rightarrow status

Candidate Key: maintenance_id

Already in BCNF since LHS is a candidate key.
